While it is simple to use, Livenet has a number of features and options that are easy to access. As an explorer and surfer of the Internet, you will find Livenet gives you many more options and controls

---

that you simply can't find in other web browsers. Imagining a web browser with the speed of Internet Explorer 6, the simplicity of Netscape 3 and the power of Netscape 6? Welcome to Livenet! Livenet has lots of options and features, some of which include: Advanced Filtering Livenet's advanced filtering system allows you to block all types of content and even individual sites based on keywords and phrases you choose. Livenet is more than your average web browser. It is your personal tool to get the information you want, when you want it. Livenet's advanced filtering system provides the ability to block any site or content that comes through. It has two main methods for blocking a site or content. You can either block the entire site or individual pages on the site. Blocking an entire site will block all pages and content inside the site. You can then specify a time frame to block the site for so that you do not accidentally access the site. You can also specify a site's URL to block. This is useful if the site has specific content that you don't want to see, such as a malicious site or "phishing" site. Block individual pages: With a single click of the mouse, you can select the page you want to block. This is very useful for helping to block highly inflammatory or intrusive sites, or even sites that contain child pornography or other material that you don't want to see. You can also set the time period for the block. This lets you block one page at a time from a site that contains a certain keyword, or if you want to block all the pages on a site for a certain amount of time. You can further refine your blocking by limiting the types of language on the pages. For example, you can filter content b7e8fdf5c8

Stream over 200 stations from around the world, including the hottest hits from Alternative, Rock, Hard Rock, R&B, Heavy Metal

## What's New In Livenet?

Livenet is an easy to use and install web browser, designed to make surfing the web faster, safer and easier. The program has a number of settings that can be adjusted to make the program just right for you. One of the latest and greatest updates is the filter system - it searches the whole page for keywords that you choose to be filtered. If any of those keywords are present in the page (even in the html code) then the user is taken to a "Sorry this page is filtered" page. Livenet License: Livenet is freeware. Warning: One thing that is great about Livenet is how it can be used as a front end. When accessed by a web browser the results can be in the form of flash files - all really easy to view and direct to where they should be - they have nice features as well. Livenet Shortcuts: If you are looking for a shortcut to one of your favorite search engines and want to add that to your favorites list here is a simple method to do this: 1. Either Livenet or Infobyte are in your search engine of choice - lets say the latter for this example. 2. Once they are open you want to copy the address. If using Livenet you want to go to the SE of choice and then click on the "tutorial" tab - this is the "Tools" tab on Livenet. 3. The top half of the "Tools" tab should look like this: 4. Now a dialog will appear on the bottom of the screen, letting you paste the URL into the box. 5. Once you've pasted the URL and clicked in the box you want to bookmark it, the box that now says "Add to favorites" will turn into an on/off button and a check mark will be beside it. Simply click on that check mark. 6. If you want to store all your favorite pages in one folder simply right-click any folder and click "Add to favorites". The articles below are quick notes on using Livenet, and not necessarily how to use it the best way, but will be helpful if you are new to the program. Livenet Search: If you want to use Livenet to search the whole page for a string or keyword simply go to the "search" menu and select the one that you want - I normally
